

CS-200e & CS-220e

Key Features & Benefits

Drastically reduce your print per card cost!

YMCKO (400 print)
Black Resin ribbon (1,000 print)
Half-Panel YMCKO ribbon (560 print)

- Save between £280 – £500 when printing 10,000 cards using YMCKO against other leading brands in its class!
- Every ribbon includes a free cleaning roller and a free cleaning card to reduce your consumable price. It is supplied as standard in the same packaging as each ribbon.
- 1,000 prints from a single ribbon when printing black drastically reduces the price per card.

A low-cost printer - Check the data sheet to see how good it really is!

- Wide colour gamut giving feature-rich colours using 300 dpi continuous tone.
- Quicker speeds against its rivals:
 - YMCKO print is taking just 21 seconds
 - Black resin prints taking an astonishing 4.5 secs
- Large Input / Output hoppers (100 cards/50 cards)
 - Option to upgrade a 400-capacity input hopper
- Wider card tolerance up to 1mm to accommodate standard PVC cards, smart cards and proximity cards.
- Compact size – measuring only 198mm (W), 204mm (H) and 354mm (D).
- Optional Modules available to support Ethernet Connectivity (TCPIP), Hi-Co & Lo-Co Magnetic Stripe (ISO7811), Contactless Encoding (ISO14443A, ISO14443B, ISO15693), and Contact IC chip encoding modules.

For peace of mind, the HiTi Digital Global brand has been selling card printers since 2006!

- The latest CS-200e & CS-220e printers are known for their reliability and fast printing.
- HiTi Digital now has a team of more than 700 people worldwide in R&D and manufacturing. The headquarters are in Taiwan with a global logistics facility in Suzhou, China.

Excellent Warranty and Additional Support Packages available

- A full 3-year warranty for parts replacement; this is limited 24 months or 100,000 card passes for the Thermal Print Head (TPH).
- A Silver Support Package is offered in addition to the Standard Warranty providing full email support and 45 days of telephone support.
- Upgrade to the Gold Support Package providing all the benefits of the Silver cover but with full telephone support, an annual printer service and a free loan printer during repair. See the HiTi Support document for further information.

Get up and running in no time at all

- Plug and play...requires little technical knowledge with a simple USB connection!
- Free copy of the intuitive CardDesiree CS design software (see more details below).

Features of the CardDesiree CS Card Printing Software (*Free with every purchase of a HiTi CS-200e & CS-220e Card Printer)

Friendly Template Design Interface

Easy to setup & unlimited card layouts for single or double sided printing. With an advanced card designer, print to any Windows Printer and what you see on the design interface is what you will get!

Convenient Database Connectivity

Connect layouts to variable data lists stored on MS Access, MS Excel or any ODBC connected database. Both internal View or Table Connectivity is available.

Batch Print Management

When using variable data, CardDesiree is able to merge and print in a single action. The order of print can be controlled by your data or individually.

Superb Photo ID Editing Design Tools

This includes the ability to lay down 1D & 2D barcodes, shape drawing tools, a text editor, variable objects, image tools and photos.

Security

Restrict user access with built in user controls.

Encoding

Add encoding to Hi-Co and Lo-Co magnetic stripe(s), MIFARE® Classic 1K or 4K cards or Smart IC contact chip technology. Please ensure you have added the necessary hardware option to the printer to enable these features.

Should you wish more Advanced Card features, please refer to the USC Card Exchange Pro PDF which has more advanced features and compares the features to CardDesiree.
